Web Scraping! >:(

- Techniques
    - Observe a sample
        - Doesn't actually have contact with the people or thing your measuring
        - Can make people act differently
    - Survey a sample
        - interviews
            - More in depth
            - More time consuming
        - Questionnaires
            - Less in depth
            - Less time consuming
    - Experiment on a sample
        - Use scientific processes and tools
    - Use data someone else has responsibly collected
        - Have to make sure its reliable
        - Types of data
            - API Requests
                - HTTP Requests
                    - Uses HTTP protocol to create requests for api data
                        - Use the get function
                        - Web scraping as well! (doesn't have to use api)
